A TCO Analysis for a FinTech Company on AWS

The Company

Online-only company that grants instant personal loans

Lightbits worked with a rapidly growing fintech company to calculate how much they'd save with Lightbits on AWS.

1M

New borrowers per month

2.4x

More instant personal loans granted in 2023

10 Min

Time goal for granting an instant personal loan

The Challenge

Maintaining fast service as their customer base doubles

The company needed to cut cloud costs and put money back into the business to meet growth targets.

Company's Existing Cloud Environment

Scale-out MySQL database

35 AWS EC2 instances

700 TB of EBS gp3 storage

aws

MySQL

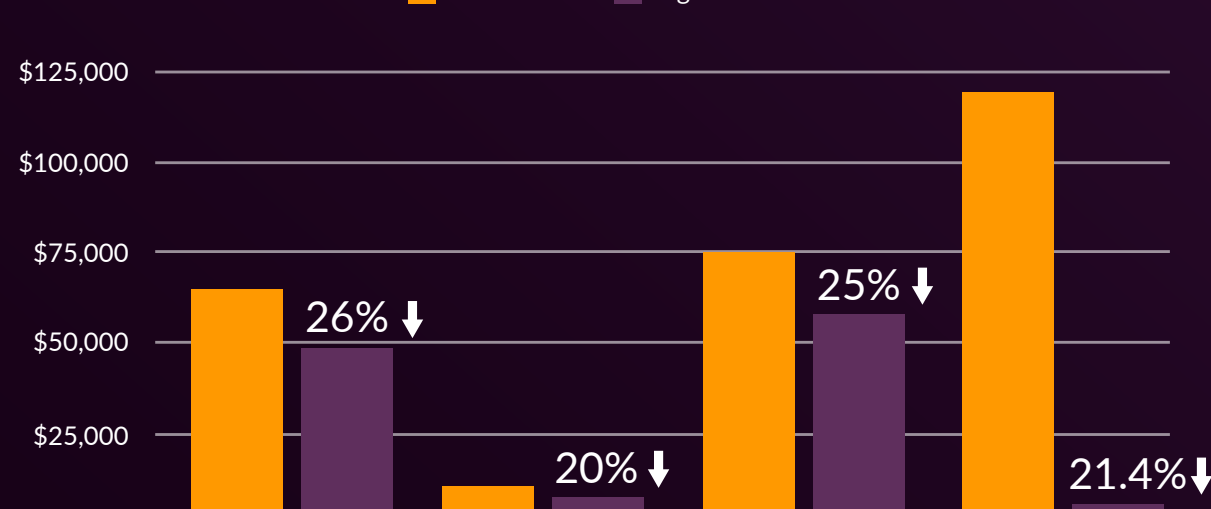

The Results

26% lower TCO with a platform that scales for rapid growth

The company was wasting both storage and CPU resources to get the performance they needed. With Lightbits, they can reduce TCO 26% today and be prepared for customer expansion with almost 16 times more performance.

AWS costs per month

Current Lightbits Labs

aws

lightbits

↓ 26%

Lower TCO with Lightbits

↑ 15.9x

More IOPS than current AWS storage

↓ 25%

Fewer AWS instances required

The Guarantee

Superior cloud storage performance for less than half the cost

Let Lightbits prove cloud value with you in three steps—and with a risk-free guarantee.

Superior
cloud storage
performance

50%
lower
cloud cost

STEP ONE

Schedule a 30-minute cloud assessment

- Assess key application workloads running on AWS or Azure
- Predict potential cost savings and performance improvement

STEP TWO

Purchase Lightbits Cloud Quickstart Kit

- A refundable investment of \$25k-\$50k gets you started
- We will test & optimize your cloud workloads with Lightbits and deliver a comprehensive Cloud Quickstart Report

STEP THREE

Deploy Lightbits into production or get a full refund

- Deploy: Full value of Cloud Quickstart Kit will be credited
- Decline: Receive full refund if we fail to meet our guarantee

Get started with your risk-free guarantee today.
